

THE KING'S ACADEMY

WHO WE ARE

The King's Academy is an independent, nonprofit coeducational college preparatory school, grades Pre-K through twelfth. Founded in 1998, TKA has an enrollment of approximately 175 students. Enrollment draws from 15 school districts, covering 2 counties, as well as 8 foreign countries. New students are admitted to all grades. There are currently 22 members of the teaching faculty of whom 100% hold bachelor's degrees and 41% hold a master's degree or higher.

OUR MISSION

The King's Academy provides Christ-centered academic excellence to train leaders in knowledge, wisdom and godly character. The school provides a distinctive college preparatory Christian education, which is dedicated to developing its students' unique talents and gifts while graduating young men and women who are able to demonstrate Christian character in their daily lives through their relationship to Jesus Christ. The King's Academy believes every student should have the opportunity to excel academically in an environment that nurtures their relationship with Christ.

CLASSROOM CULTURE

We keep our student to teacher ratio small in order to provide students with individualized attention and differentiated learning. Our faculty and staff believe that student leadership should be emphasized at all levels, so encourage students to strategically problem solve and take initiative.

WORLD EMPHASIS

TKA has a broad reaching international program. Students from around the world travel each year to study as students in TKA classrooms and live in TKA host homes. Education for all is enhanced as a global community is created on our campus as a way to enrich our student body and spread the Good News abroad.

HIGHER EDUCATION

TKA has proven to fully prepare our students for higher education. With 95% college placement, TKA students have moved on to prestigious undergraduate and graduate colleges and universities. Our AP courses are designed to put our students a step ahead of the rest. Not only that, our SAT averages surpass area school districts by 10.7%.
